

Your life. Your health. Your care.

Get connected and thrive with PatientHub.

Tracking your treatment data and trends can help you make healthier choices and thrive. With PatientHub, you and your care team can easily check your progress and stay connected in between your monthly visits.

PatientHub can help you stay active in managing your care.

Manage your appointments

View your calendar to easily manage your appointment schedule and join your telehealth appointments.

Exchange secure messages with your care team

Connect and communicate with your care team from home with secure messaging through PatientHub.

Access lab results and see trends

Access your lab results and trends so you can be empowered with the information you need, where and when you need it.

View historical health data

Take control of your health and see how your historical health and treatment data, including vitals, have changed over time.

View medications

Access information about each of your medications, including the name of your medication, your prescribed dosage, and how to take your medication.

Submit flowsheets electronically

Submit your daily flowsheets on your computer, tablet, or smartphone. Your data will be automatically sent to your care team for review.

Access the online community

Ask questions, share stories, and learn more from others sharing similar experiences with kidney disease through our Kidney Care Community.

Order and track supplies

Access your order history, submit your supply order, and check your delivery status. You can also sign up to receive email and/or text notifications about your order.

START TAKING CONTROL OF YOUR HEALTH TODAY.
